

Self-Dumping Hopper Models

Handled by a common forklift.

Standard sizes: 1/2, 1, 1&1/2, 2, 3, 4 and 5 cubic yards.

Available in basic, standard and gravity/vacuum styles.

Sludge is pumped or conveyed into the container, liquid is drawn off by gravity or pump suction, and the remaining solids are dewatered and ready for disposal.

Standard container bodies are constructed of 10 gauge carbon steel.
